NOTES:

(1) Employment refers to payroll employment and excludes sole proprietorships.

Wages refer to the wages of payroll workers. BEA's local area estimates of total employment are not available for 2005 and local area estimates of total compensation are not available prior to 1998 or after 2004.

(*) Wages and personal income are deflated with the CPI-RS and expressed in 2005\$.

(3) For employment and real wages, superregions will not add up exactly to state-level totals because state-level numbers include estimates whose county origin is not separately identified in BLS' county-level data.
